Sector – Manufacturing –“Value Added” - Wood

Green Check – Year 1 – 09

Aurora Custom Mouldings

Consumer Message

“Aurora Custom Mouldings is recognized for its “value added” wood products and its utilization of wood fibre from certified (FSC) sustainable forests.”

Recognition Summary for Consumers

Aurora Custom Mouldings utilizes wood fibre from **Forest Stewardship Council sustainable forests**. These forests – often community based – have gone through the rigor of certification and auditing. This certification is a commitment to good forestry practices, carried from forest to consumer. The standards ensure environmental, community; worker and industry needs are balanced. FSC dimensional lumber used by Aurora Custom Mouldings are a standard for healthy forests –ecologically sound and supporting First Nations.

Clients utilizing Aurora Custom Mouldings’ products are committing to Making A Difference Environmentally (MADE). The wood products manufactured through Aurora Custom Mouldings , is acknowledged by the Green Check program for its link to environmental sustainability.

Specific Consumer “link” to a Standard

Forest Stewardship Council (FSC) - www.fsccanada.org - Products tab and then Wood Products

This explains the process of certifying sustainable forests and the many wood products that reach the consumer via value added companies such as Aurora Custom Mouldings.

Aurora Custom Mouldings is a leading example of utilizing all aspects of the wood fibre they receive. The company understands the natural and recyclable qualities of wood.

Aurora Custom Mouldings is committed to its environmental and quality assurance reputation as a source of high-value, custom designed wood products. Trees are our largest plants and wood fibre truly is a renewable resource when compared to other raw materials. This is the essence of the FSC process ensuring there is a forest of tomorrow.

Other Green Check Initiatives of Aurora Custom Mouldings

- Residual wood shavings are bagged and retailed to local farmers for bedding
- Larger wood chips are incinerated for an internal heat source
- No chemicals are used in the manufacturing process

Next Steps

At present Aurora is planning to install a new dust filtration tower to reduce the amount of particles exhausted directly into the environment.
